

Supports accelerated wound healing and closure

Enhance healing with the proven solution for protection and hydration¹

Episanis™ BioHAnce™ Skin and Wound Gel

- **Only skin and wound gel with patented hyaluronic acid (HA):**

Episanis™ contains a patented hyaluronic acid (HA) polymer gel technology that extends hydration and lubrication while creating a tissue scaffolding matrix that accelerates tissue healing and promotes rapid wound closure.¹

- **Soothing protection and hydration:**

Creates a thin, soothing biofilm on the surface of the skin that helps protect the affected area and keep it hydrated.

- **Engineered for busy pet parents:**

Enhanced duration means a single daily application may be all that is needed for uncomplicated injuries.

- **Formulation is based on naturally occurring ingredients found in the body:** Unique formulation contains no preservatives or synthetic additives that may cause stinging, pain or irritation.

- **Millions of doses of BioHAnce technology have been sold to veterinarians²**

- **Developed, manufactured, and studied in the United States**

"The Skin and Wound Gel is by far the BEST on the market! We have used multiple products to support wounds of all sizes, but nothing has worked as fast as this gel. Clients are even buying extra bottles to keep on hand just in case. Highly recommend this product!"

- Gordon Rhine, Central Hospital For Animals
