

EYE LUBE PRO

Contains 20% more Hyaluronic Acid than OptixCare™

- Bulk format lubrication containing 0.30% traditional HA and carbomer
- Value-based approach to lubrication
- Ideal solution for lubrication needs during anesthesia and sedation
- Contains 20% more HA than OptixCare
- In situations where the blink reflex is diminished, such as during and after anesthesia, it is recommended lubrication be applied every 30 minutes.
- Manufacture by Dômes Pharma in Salt Lake City, Utah
